

STANDARD DRAWINGS

1.0 Introduction

This section provides information about Standard Drawings. Standard Drawings are also discussed in Chapter A Contract Documentation.

2.0 Standard Drawings

Standard Drawings form part of the Contract Package and consist of:

- Ontario Provincial Standard Drawings (OPSDs)
- Ministry of Transportation Ontario Drawings (MTODs)
- Structural Standard Drawings (SSDs)

Standard Drawings are part of the Contract Package but are not part of the Contract Plans or Contract Drawings and are therefore not printed in the Contract Drawings except when modified.

3.0 Incorporating Standard Drawings Into the Contract Package

As shown below, applicable Standard Drawings are listed in Section C of the "Schedule of Provisions, Contract Plans, Standard Drawings, Specifications and General Conditions" (Schedule) in the Tender Document.

The Contractor obtains copies of the applicable drawings directly from the [MTO Technical Publications](#) website.

4.0 Modification of Standard Drawings

Standard Drawings that are modified for use in a Contract Package are excluded from the schedule. Once modified by the Designer, the drawing becomes part of the Contract Plans and is printed in the Contract Drawings.

The use and modification of OPSDs, MTODs, and SSDs is discussed further in the other 200 series sections of this chapter.
