

**INCENTIVE FOR SUPPLY OF CANADIAN STEEL**

---

Special Provision 199S60

October 2009

---

**1.0 SCOPE**

This Special Provision provides for an incentive payment for supply of Canadian steel for listed steel items.

**2.0 DEFINITIONS**

**Canadian Steel** means new steel manufactured within Canada demonstrated only with a mill test certificate from a Canadian mill.

**3.0 APPLICATION OF INCENTIVE**

The Contractor shall receive an incentive payment of 10% of the theoretical value of Canadian steel for the following steel products or items:

- a) Sheet Pile
- b) Tube Piles
- c) Caisson Piles
- d) Reinforcing Steel Bar
- e) Coated Reinforcing Steel Bar
- f) Any steel provided for the tender item Fabrication of Structural Steel

**4.0 BASIS OF PAYMENT**

The theoretical value for Canadian steel shall be determined from the weight in tonnes of steel supplied for the above products or items multiplied by \$1,000 per tonne. Only Canadian steel supplied for the above items and forming part of the Work shall be eligible for the incentive payment. Used steel, steel used for temporary purposes, and steel left in place but not part of the Work, is not eligible for the incentive payment. Ancillary steel items such as bolts, nuts, weldment, etc. shall not be included when determining the tonnage of steel supplied.

The Contractor shall submit the detailed calculations (lengths and unit weights) for the tonnes of steel together with mill test certificates from Canadian manufacturers for the steel. For components without linear unit weights, the unit weight by volume shall be 7,850 kg/m<sup>3</sup>.

**5.0 PAYMENT**

The Contractor shall submit only a single application for the Canadian steel incentive for all the Canadian steel for the above products or items supplied on the contract.

An incentive payment shall be made of 10% of the theoretical value of Canadian steel supplied.

Payment for the Canadian Steel incentive shall be made after Substantial Performance.

WARRANT: All contracts.
