

Notes:

- 1 Chain wrapped around twice and secured to anchor block by cable guiderail staples.
 - 2 Size of conduits, terminal adapter, locknut and straps to suit the number of detector loop cable leads.
 - 3 For count station with four (4) detector loops or less, rigid PVC duct may be run directly to the detector loops without the use of an electrical handhole.
 - 4 Where there are multiple detector loops and an electrical handhole is used, the detector loop cable leads shall all be grouped together and inserted into the riser conduit straight to the PVC electrical panel without splicing.
- A All dimensions are in millimetres unless otherwise shown.
B Drawing is not to scale
