

NOTES:

- 1 The width, height, mounting holes, and wiring aperture of the bracket shall suit the luminaire and fittings for conduit entry and shall be suitable to accommodate the opening of the luminaire door.
- A Bracket shall be stainless steel when attached to atmospheric corrosion resistant structural steel components. For all other applications, brackets shall be stainless steel or hot dip galvanized steel according to ASTM A123.
- B All dimensions are in millimetres unless otherwise shown.
